SUMMARY

B.Tech Computer Science and Engineering student graduating in 2027, proficient in Java with strong foundations in Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks. Hands-on experience developing full-stack applications, building REST APIs, integrating databases, and implementing frontend-backend communication using React.js, Node.js, and Express.js through internship and academic projects.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6), SQL

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Frontend: React.js, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, REST APIs

Databases: MySQL

Tools: Git, GitHub, Postman, Vercel, Render

EDUCATION

B.Tech in Computer Science and Engineering Expected: 2027
Sri Venkateswara College of Engineering | CGPA: 8.89/10

Diploma in Computer Science Oct 2021 – May 2024
B.I.T Institute of Technology, Hindupur, AP | 91.12%

Secondary School of Education 2021
Vignan Em High School, ODC, AP | 99.83%

EXPERIENCE

Full Stack Developer Intern – SmartBridge Educational Services Pvt. Ltd. May 2026 – June 2026

- Developed a full-stack Book Store Management System using **MongoDB**, **Express.js**, **React.js**, and **Node.js**(MERN)
- Designed REST API endpoints for book CRUD operations and integrated frontend requests with backend services.
- Implemented MongoDB data operations and error handling to manage application requests and database interactions. [Live Demo] | [GitHub]

PROJECTS

PlacementHub — Career Preparation Platform [Live Demo] | [GitHub]

- Developed a full-stack placement platform using **React.js, Node.js, Express.js, and MongoDB Atlas**.
- Automated off-campus job aggregation from company career boards and job archives.
- Built **REST APIs** for job matching, interview experiences, and placement preparation resources.
- Deployed using **Vercel and Render** with GitHub Actions CI/CD.

ATSense – AI-Powered Resume & Job Matching Platform [Live Demo] | [GitHub]

- Built an AI-powered resume-job matching platform using **React.js**, **Node.js**, **Express.js**, and **Retrieval-Augmented Generation (RAG)**.
- Integrated Qdrant vector search and Sentence Transformers embeddings to enable semantic matching between resumes and job descriptions.
- Developed REST APIs for resume analysis, ATS scoring, missing-keyword detection, and skill-gap identification.

Personal Expense Tracker [Live Demo] | [GitHub]

- Built a responsive expense management application using **React.js**,and **Firebase**.
- Integrated Firebase Authentication for user sign-in and authentication workflows.
- Implemented expense CRUD operations and real-time data synchronization using Cloud Firestore.
- Developed expense categorization and tracking features to help users monitor their spending.

CERTIFICATIONS

SQL (Intermediate) – HackerRank

Generative AI Literacy – Simplilearn
